Palletizer

3 in 1 machine receives individual pallets and basket stacks to deliver fully-loaded pallet with (4) basket stacks to downstream equipment

DESIGN INNOVATIONS

AMF's Palletizer typically receives loaded baskets from a fully-automated Basket Stacking System to deliver four stacks of baskets to each individual pallet. Designed for heavy-duty applications, the Palletizer ensures smooth basket transfer with automated pattern configurations to accommodate a wide variety of basket types and multiple loading patterns.

QUALITY

Designed with heavy duty, high-quality materials, the individual, automated top-bottom selection system manages different types of pallets to suit your individual production needs.

SIMPLICITY

AMF stacking technology offers the smoothest transfer to the loading zone. Simple, mechanical design ensures minimum maintenance and longevity.

PERFORMANCE

Automatic pattern forming zone manages up to four basket stacks at a time to efficiently discharge stacks to downstream equipment.

RELIABILITY

User-friendly operator interface incorporates easily adjustable parameters to optimize system performance. Accurate and consistent pallet loading suited for a wide variety of baskets ensuring maximum reliability.

Accuracy Meets Consistency

OTHER ADVANTAGES

- ▼ Custom-configured with quality materials and components to ensure high performance, minimal maintenance and longevity
- ▼ Palletizes up to 35 pallets per hour
- ▼ Optimized for plastic baskets loaded onto plastic pallets
- ▼ Easy-to-operate, remote control panel, Allen Bradley PLC and PanelView with intuitive pushbutton controls
- ▼ Stack feed, motorized lift and basket transfer system are fully integrated to provide trouble-free automated stacking
- ▼ AMF basket pusher robust design, gently transfer baskets
- ▼ Carriage system optimized for smooth and continuous motion
- ▼ Seamless integration with basket stack conveying system and downstream wrapping equipment

SPECIFICATIONS

Shown without guarding

OPTIONS

- Arc Flash reduction panel
- Conveying system controls integration
- NEMA painted or stainless steel electrical enclosure
