# PanelView Plus Operator Interface Upgrades

*Upgrade your machines with new PanelView Plus Terminals!*

## Why Upgrade?

As your existing equipment becomes older and less reliable, it could severely affect your plant's productivity. PanelMate and CRT Terminals are virtually obsolete and extremely hard to replace.

To keep your plant running at optimum levels, you need readily accessible information, and a stable, reliable platform to allow operators to interface with that information in order to maximize productivity.

## New, Better Technology with the PanelView Plus Operator Terminals

Be ready for your plant's increasing manufacturing and equipment information demands. PanelView Plus Terminals offer new, brighter, powerful, energy efficient, LCD graphical displays capable of producing Trending information, Expressions, Data logging, and Animations!

## We Have The Right Solution For You.

Let our experts handle a seamless integration into your existing application and machine configuration.

1. Select your PanelView Plus Interface(s) 600, 700, 1000, 1250, 1500.
2. Select complete new Operator Station with Stainless Steel Enclosure (optional) or retrofit to your existing equipment.
3. We'll handle the programming of new components.
4. Updates to electrical schematics included.
5. Modification of existing box enclosure depending on interface selection and machine configuration.
6. PLC Processor or Firmware upgrade may be necessary.
