# A-Series Conveyors

---

Designed for high operating efficiency and low maintenance, the A-Series Conveyors are built with anodized aluminum beaded plates and rust-free materials.

# DESIGN INNOVATIONS

AMF offers the perfect conveyor solutions engineered to meet food industry standards. Proven reliability with components designed for each specific application and low-maintenance operation.

## CONTROL

AMF's complete conveying systems are engineered with electrical enclosures suited for all conveying applications.

## QUALITY

Custom-engineered by application, AMF conveyors are built with high quality materials and the best belting technology available in the food industry.

## RELIABILITY

AMF's conveyor design is built for performance, the result of many decades of successful installations, customer feedback, and continuous improvement.

## PERFORMANCE

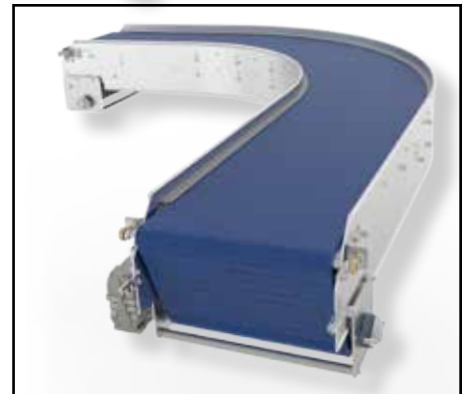

High-performance A-Series Conveyors are suitable for the bread industry and meet customer expectations when premium quality and low-maintenance operation are required.

Dual Strand Model

Partial Width Model

Full Width Model

## Engineered for Performance

# OTHER ADVANTAGES

- ▼ Robust construction with quality materials and components optimizes the performance and life expectancy of the conveyor
- ▼ Custom conveyor solutions are engineered to specific application and layout requirements with the highest safety standards
- ▼ Designed with vertical belt support rails to eliminate debris accumulation
- ▼ Two-piece sprocket guard for high safety levels and zero build-up
- ▼ Anodized aluminum flat bar rails with UHMW clip-on wear strips are held with a stainless steel threaded rod and aluminum round spacers
- ▼ Conveyors are built with high quality stainless steel hardware

Anodized Aluminium Flat Bar Rails

Two-Piece Safety Sprocket Guard

Beaded Aluminium Side Frame

Beaded Anodized Aluminum Guides and UHMW Wear Strip

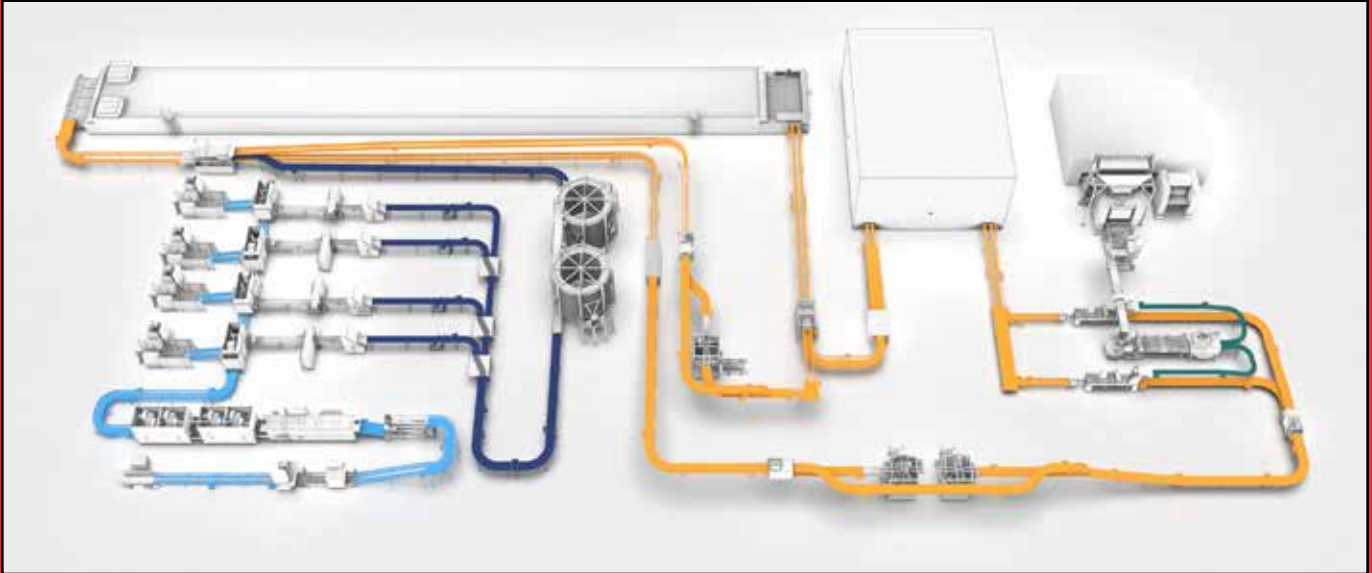

Distinct Disconnect Switch for Easy Installation

Stainless Steel Tubing Leg Design
