Mark 60 Bread Bagger

Small footprint bread bagger designed with straight-line configuration for reduced downtime and easier maintenance.
The Mark 60 Bread Bagger features a maintenance-free, pendulum scoop drive and flusher discharge conveyor for the smoothest loaf transfer available. The drive design handles speeds up to 60 loaves per minute.

**PERFORMANCE**
The only bread bagger available with a patented pendulum scoop drive to provide the smoothest scoop operation at all operating speeds, from 30 to 60 LPM.

**QUALITY**
Automatic dual wicket exchanger allows wicket change without stopping operation. Bag over bread scoop system technology protects bags from crusty loaves minimizing damaged packages.

**RELIABILITY**
The pendulum drive eliminates the costly maintenance of the high friction slide actuators used by all other major manufacturers.

**EFFICIENCY**
Patented flusher discharge conveyor eliminates loaf disruption often caused by conventional flusher bars turning loaves over at higher speeds resulting in product quality issues. Accessible lockout removes disconnect option improving safety.

**Efficiency Delivered**
Up to 60 LPM
OTHER ADVANTAGES

- Corrosion resistant Steel-it® finish painted tubular frame and stainless steel guards.
- Pendulum scoop drive ensures low vibration and optimal operation.
- Highly accurate cantilever pneumatic blockade assembly.
- Skip loaf device allows for manual placement of a bagged loaf for closing without stopping equipment.
- Automatic dual wicket exchange system designed with U-shaped steel wire to hold down empty bag stacks.
- Discharge belt featuring patented flusher action eliminates the need for a flusher bar and provides a smooth product transfer.
- Micro mist separator filtration system up to 0.01 μm, (99.9 %) filtered particle size.
- Painted steel machine mounted enclosure with programmable logic controller for intuitive operation. Ethernet communication, online edition and PowerFlex AC inverter 5 HP with brake resistor.
- Optional bag closure unit and printer.
- Available with different options to suit client product specifications.
