Servo Rotary Zig-Zag Gate Upgrade Kit

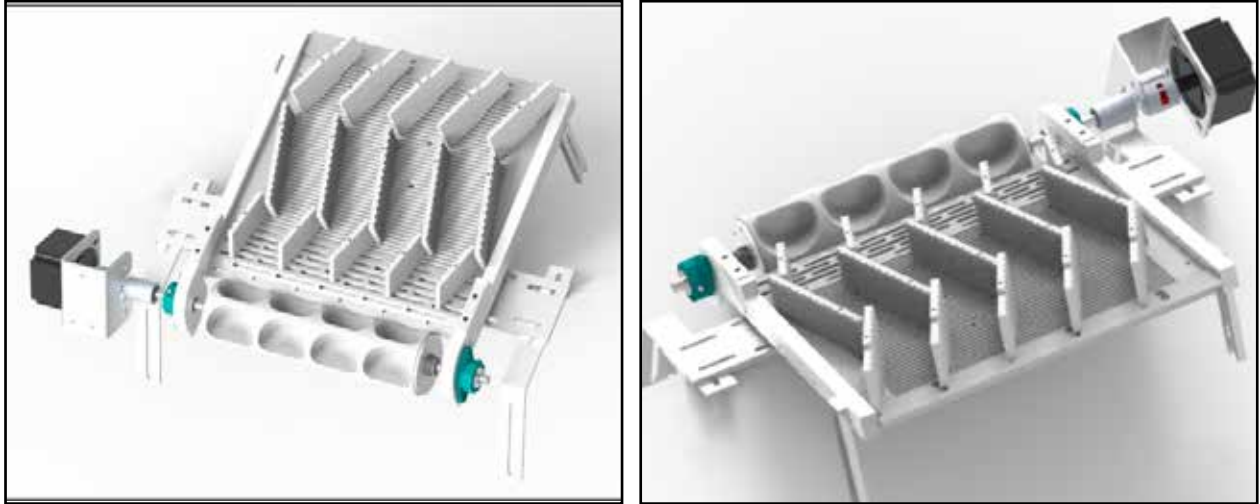

Replaces current linkage-based flapper gate or pneumatically-driven rotary gate configurations on bun and roll lines

IMPROVE YOUR EXISTING BUN AND ROLL LINE WITH A NEW SERVO ROTARY ZIG-ZAG GATE UPGRADE KIT

- Greatly improves the accuracy and performance of your bun/roll make-up operation, thus saving time and money by reducing dough waste
- Reduces overall machine air consumption and lowers noise levels in the operating area

Servo Rotary Zig-Zag Gate Upgrade Kit

KEY FEATURES

- Designed for multiple AMF machine vintages
- Available for 4, 6, and 8-across configurations
- Available with and without zig-zag board and deflectors
- Compatible with different types of existing flour reclaimers

KIT TYPICALLY INCLUDES
