

# Dough Trough

---

The 304 stainless-steel Dough Trough design is the appropriate carrier for all types of dough and suitable with AMF's trough hoist system.

# DESIGN INNOVATIONS

AMF's Dough Trough meets food industry requirements for easy cleaning and low maintenance. Harmonize the dough development during the proofing process. Heavy-duty casters are designed for effortless handling in the bakery.

## SANITATION

A built-in bottom drain reduces cleaning time and orients waste water directly into the floor drain.

## QUALITY

AMF's Dough Trough standard design is 304 stainless steel, 11 gauge and 2B finish. Heavy-duty ball bearing swivel plate casters mounted to sanitary caster shoes, ease movement into the bakery.

## RELIABILITY

High quality construction with radius corners, exterior welded seams, emery buffed and cleaned. Internally welded seams are ground flush and polished with continuous welds for easy sanitation.

*Shown integrated with Trough Hoist, Mixer and Dough Chucker.*

## Sanitary, Seamless Construction

# OTHER ADVANTAGES

- ▼ Quality material ensuring minimal sanitation and maintenance
- ▼ Radius corners with internal and external frames improve functionality and sanitation
- ▼ Bottom drain for proper waste water discharge
- ▼ Heavy-duty ball bearing swivel plate casters are mounted for easier traveling throughout the bakery
- ▼ Sanitary casters and caster shoes make sanitation easier
- ▼ Special size troughs are available upon request
