

# Dough Feeder

---

Designed with simplicity and sanitation in mind, utilizing a set of rotary cutting blades that gently process a wide variety of dough into “chunks” of dough that can be easily transferred to downstream make-up equipment up to 24,000 lbs per hour.

# DESIGN INNOVATIONS

With over 50 years of experience in bakery equipment, AMF's Dough Feeder is designed to efficiently transfer a wide variety of dough including breads, rolls, buns, flour tortillas and pizza dough. The Rotary Cutting Blades are coated with a durable Teflon Coating that provides excellent dough release characteristics. The Rotary Dough Feeder provides a seamless integration with the AMF mixer, divider and dough transfer conveyors.

## SANITARY

The stainless-steel design frame provides ease of cleaning, and significantly reducing the sanitation workload.

## QUALITY

Heavy-duty construction with quality materials and components ensuring high performance and longevity.

## SIMPLICITY

No operator adjustments required. Low maintenance.

## GENTLE

The gentle action of the Rotary Cutting Blades will not damage or overwork the dough providing a "stress-free" transfer of the dough.

Trough Hoist and Bread Divider*

## Safety by Design, Simplicity in Operation

# CONTROLLED DOUGH FLOW

## Trim Return (Optional)

The overhead hopper receives dough continuously from the sheeting line or via a bowl lift system.

- ▼ AMF Trim Return receives scrap dough from a sheeting processing line and reintroduces the dough back to the mixing process.
- ▼ The flow gate on the overhead hopper controls the dough level into the hopper of the Dough Feeder.
- ▼ Seamlessly integrated and interlocked with the mixing batching system to regulate dough demand.
- ▼ An optional oiling system prevents dough from sticking to the hopper.

*Feeder integrated with Trim Return and Dough Conveyor*

AMF Rotary Dough Feeder is an intricate part of a complete AMF integrated dough handling system.
