

# Basket Sensing Orientor

---

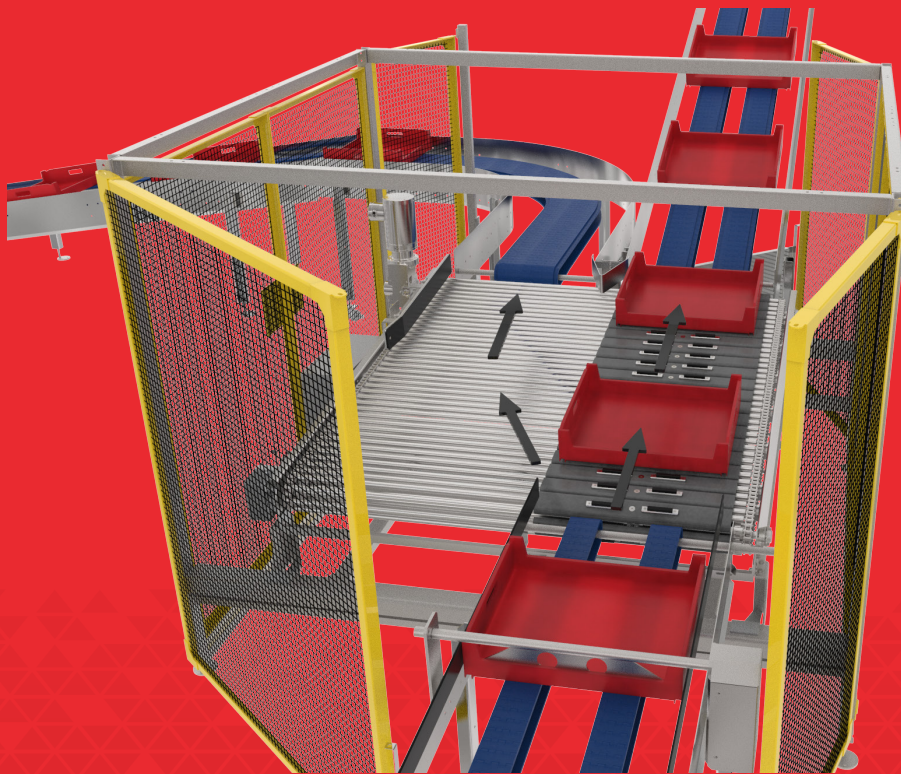

AMF offers an automated basket orienting solution for every other previously cross-nested basket, in a single direction and continuous flow. Suitable for all basket types.

# DESIGN INNOVATIONS

AMF Sensing Basket Sensing Orientor is designed as part of AMF's complete basket handling system and improve your post-packaging conveyor system.

- Simple design, easy to maintain, reliability and precision with either pneumatic or servo actuator.
- Handle up to 20 baskets per minute at any basket orientation.
- Handle up to 25 baskets per minute when turning every second basket.

**AMF IS A MARKEL FOOD GROUP COMPANY**

AMF's focus on continuous improvement may result in changes to machinery specifications without notice.
