

Bread Pan Cleaner

Sanitary, high-efficiency pan cleaning with low energy consumption, easy access and the most gentle pan handling solution.

DESIGN INNOVATIONS

AMF's Bread Pan Cleaner by AMF Convey incorporates the most gentle pan handling concept in which pans are gently carried hardway through the cleaning process. Its unique in and out configuration offers many layout configurations giving full access to the machine. The continuous motion will ensure that all upcoming pans are delivered from the Depanner without stopping or accumulating pans.

PERFORMANCE

The continuous, gentle pan handling motion is easy and simple. Hard-way pans delivered to the Pan Cleaner require only simple carrying conveyors. The Pan Cleaner can run rates higher than 50 pans/minute.

SANITATION

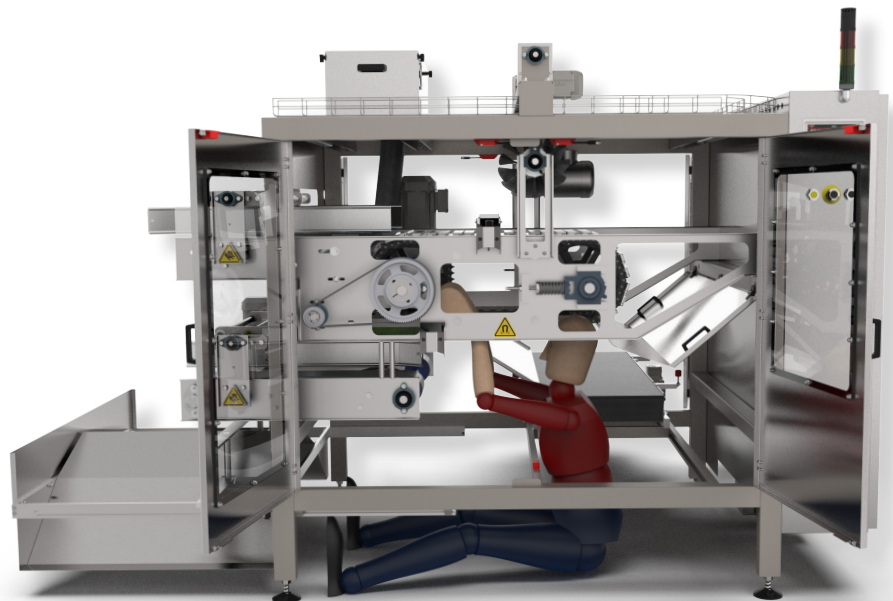

The complete machine is engineered with sanitary design principles such as accessibility and elimination of hollow areas without niches. Even though a pan cleaner is not a product zone by definition, it is important to eliminate crumbs throughout the process.

SIMPLICITY

The use of gravity to remove crumbs in combination with the high efficiency Air Knife makes pan cleaning simple. The automatic pan guides and brush height adjustments ensure optimal machine set-up.

SAFETY

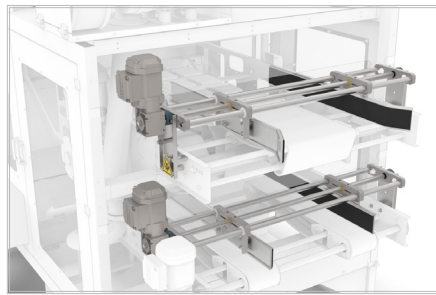

The product recuperation conveyor improves operator safety by sending the product into a recuperation bin located outside of the equipment. The crumb collecting, removable catch pans eliminate production interruption.

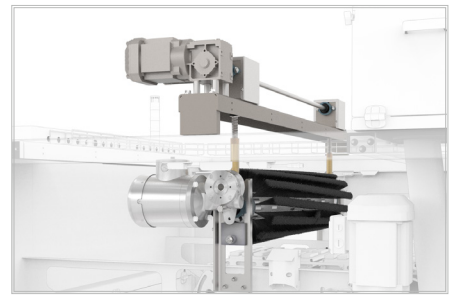

Safety by design,
simplicity in operation.

EXTRA ADVANTAGES

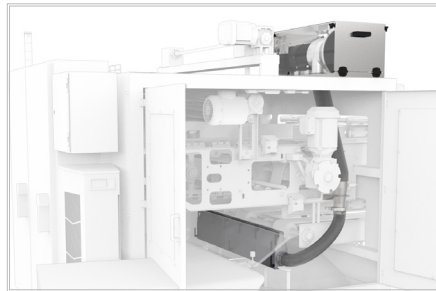

- ▼ Sanitary design with quality materials and components to ensure high performance, minimal maintenance and longevity.
- ▼ Floor level, easy access for cleaning, maintenance and operation.
- ▼ Easy operating set-up with automatic side guide and brush height adjustments.
- ▼ Strong magnets hold pans securely during brush cleaning process.
- ▼ High-efficiency Air Knife system removes leftover crumbs.
- ▼ Easy product recuperation and crumb collection performed in a safe environment.
- ▼ Energy efficient, product recuperation conveyor automatically starts and stops.
- ▼ Easy-to-operate, Allen Bradley PLC and PanelView with intuitive push button controls.

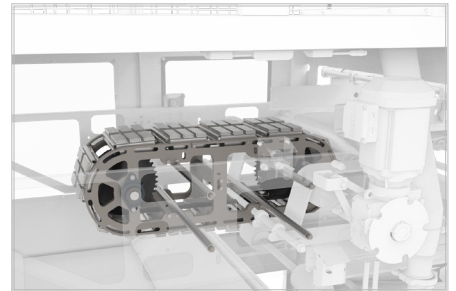

Automatic In and Out Guides Adjustment

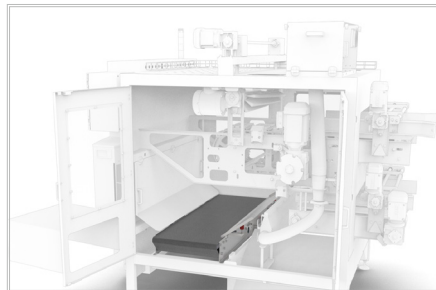

Automatic Brush Height Adjustment

High Efficiency AMF Air Knives

Efficient Magnet System

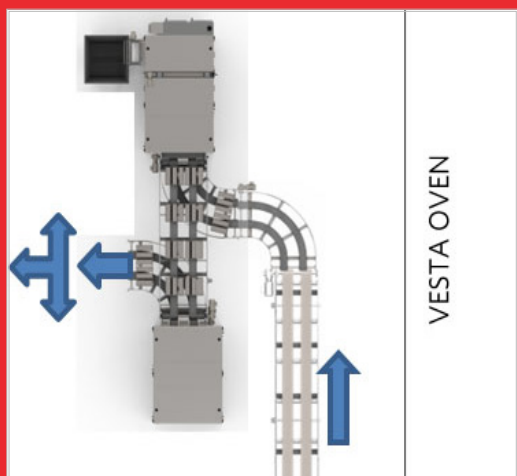

Product Recuperation Conveyor

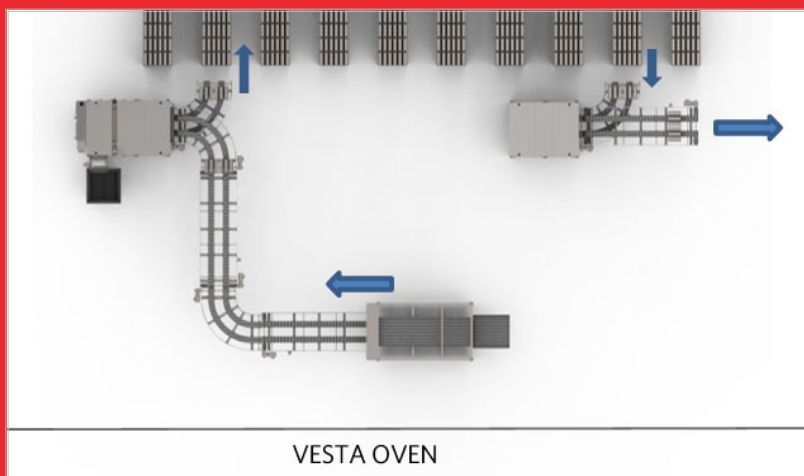

Crumb Collection Drawer

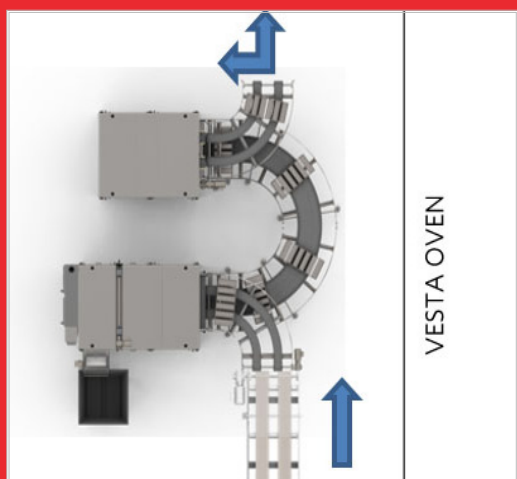

LAYOUT FLEXIBILITY

PARALLEL TO PAN FLOW

UPSIDE DOWN PAN STORAGE

PERPENDICULAR TO PAN FLOW
