

MAINTENANCE PARTNERSHIP PROGRAM

Right Solutions. Best Service. Premium Value.

By investing in the regular maintenance of your AMF equipment, you can prevent unplanned downtime and keep your production lines running at peak efficiency. As a result of this proactive and preventative maintenance, you can expect to:

Increase Machine Efficiency

AMF's technicians conduct routine inspections of your bakery equipment to identify any signs of wear and tear, malfunction, or line inefficiencies to reduce unplanned downtime.

Improve Energy Efficiency

Technicians can recommend and implement improvements such as retrofitting equipment with energy-efficient components and training to prevent errors that can lead to inefficiencies.

Reduce Waste

AMF's technicians can track and analyze waste generation throughout the production process to identify patterns and root causes. This information can then be used to implement targeted interventions to reduce waste.

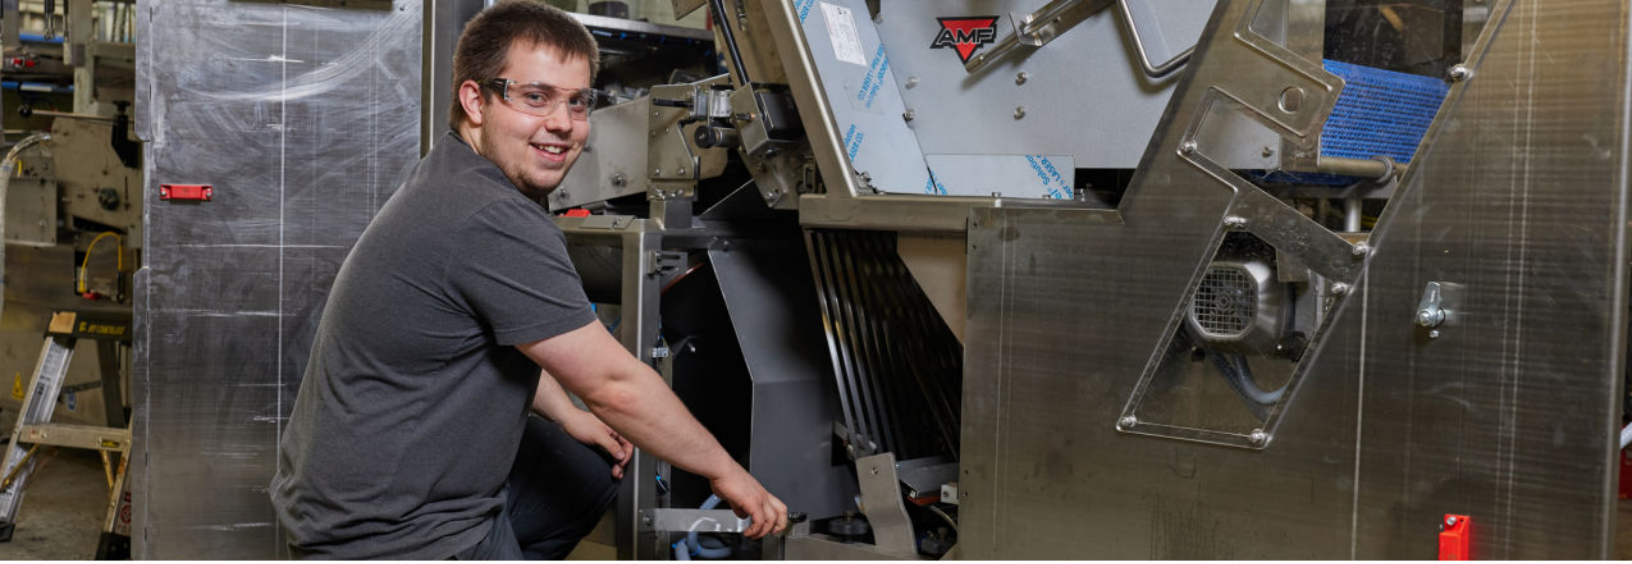

Maximize Yield

By identifying process improvements, technicians assess the overall production process and identify opportunities to streamline workflows, optimize production schedules, or implement new technologies to increase efficiency and maximize yield.

Empower Bakery Teams

We believe creating a knowledgeable and motivated team helps you hire and retain the best talent for your bakery. Elevate the confidence of your operators with proper operation and maintenance training.

SUPPORT OFFERINGS

AMF's Maintenance Partnership Program supports the longevity of your equipment and continuity of your operations. Each MPP is tailored to the unique needs of your bakery. Reduce disruptions, adhere to sanitation requirements, and maintain OEM-quality production efficiency with these support offerings:

- Regular Inspections
- Bakery Assessments
- Routine Maintenance
- Operator & Maintenance Training
- Parts Recommendations
- Equipment Efficiency Improvements
- Equipment Upgrades or Replacement Recommendations
- Operator Q&A with AMF's Expert Technicians
